1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the photographic image" in line 8. Similarly, independent claims 16, 29, 36-41 recite the limitation "the photographic image". There is insufficient antecedent basis for this limitation in the claims.

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-38 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-35 define an apparatus. However, the body of the claims lacks definite structures indicative of a physical apparatus. Furthermore, the specification, in paragraph bridging pages 60 and 61, indicates that the invention may be embodied as pure software. Therefore, the claims as a whole appear to be nothing more than a system of software elements, and software *per se* does not fall within a statutory category.

Claims 36-38 defines a background replacing **program** without being stored on a non-transitory computer-readable medium. The software program *per se* does not fall within a statutory category. The examiner suggests amending **the claim(s) to embody the program on a**

“non-transitory computer-readable medium” or equivalent. Any amendment to the claims should be commensurate with its corresponding disclosure.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
